SUMMARY

Junior web developer who has built and deployed three web projects on Vercel using React, Next.js and Tailwind CSS: BazarDor, FitLog and DevStack. Currently learning Node.js and Express.js to grow into full-stack development. BSc student in Biochemistry. Seeking a junior web developer role or internship.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap
- **Framework:** Next.js (App Router, used in project work)
- **Libraries:** BetterAuth, DaisyUI, React Hot Toast, React Toastify, Lucide React
- **Tools:** Git, GitHub, Vercel, VS Code, AI coding assistants
- **Currently learning:** Node.js, Express.js, MongoDB

PROJECTS

BazarDor — Grocery Price Information Web App

Live: https://bazardor-eight-gray.vercel.app | GitHub: https://github.com/MD-SABBIR-DEV/bazar-dor- | Stack: Next.js (App Router), TypeScript, Tailwind CSS, DaisyUI, BetterAuth, React Hot Toast

- Built a Bangla-language web app that shows today's prices of everyday groceries such as rice, lentils, oil, vegetables, fish, meat, eggs and spices.
- Displayed the daily price change with up and down indicators, plus category filtering and price sorting (low to high, high to low).

- Implemented authentication with BetterAuth (email, Google, GitHub), a user profile page, and protected product detail pages showing minimum, maximum and average prices; deployed on Vercel.

FitLog — Workout Library and Planning App

Live: https://fitlog-weld.vercel.app | GitHub: https://github.com/MD-SABBIR-DEV/Fit-log-next.js-project

Stack: Next.js 16 (App Router), Tailwind CSS, Lucide React, React Hot Toast

- Built a responsive workout library of 12 exercises with category, equipment, duration, calories and rating.
- Implemented a detail page for each exercise, a daily plan limited to 5 exercises, and a Save for Later list.
- Added live summary cards (total exercises, minutes, calories), sorting by duration, calories or rating, and Mark as Done and remove actions with toast feedback.
- Stored plans in LocalStorage so progress remains after reload; added a custom 404 page and deployed on Vercel.

DevStack — Technology Explorer and Stack Builder

Live: https://dev-stack-henna.vercel.app | GitHub: https://github.com/MD-SABBIR-DEV/Dev-stack

Stack: React.js (Vite), Tailwind CSS, React Toastify

- Built an app where users explore technologies and build a custom tech stack, loading data from a JSON file with a loading state.
- Implemented adding technologies, duplicate prevention, single and bulk removal, and a live selected count.
- Added toast notifications for add, remove and duplicate actions; deployed on Vercel.

EXPERIENCE

Private Tutor | 2024 – 2026

- Taught 3 young students from beginner level up to Class 8, explaining concepts step by step.

Sales Associate, Mina Bazar Super Shop | 2025 (6 months)

- Assisted customers and handled day-to-day shop tasks.

Assistant, Somiti (local association) | 2024 (7 months)

- Assisted with routine administrative tasks.

EDUCATION

BSc in Biochemistry — Habibullah Bahar College | 2025 – Present

HSC — Mohammadpur Government College | 2025 | GPA 4.17

SSC — Rayer Bazar High School | 2023 | GPA 5.00
